Forecast for Friday 27 Nov 2020

Weather: Any low level fog will gradually clear through morning with skies predominantly clear otherwise giving some lengthy spells of sunshine for much of the day. Cloud will gradually shroud hills of southern and eastern Snowdonia through evening.

Chance of cloud free mountain/hill tops above 800m: 90%, falling 30% in the south and east through evening as cloud becomes widely extensive above 400m.

Visibility: Generally very good, but perhaps falling markedly in the south and east later in the day dependant on arrival of low cloud.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Be aware of poorer visibility developing in the south and east later in the day. Snowdon likely staying clear.

Forecast for Saturday 28 Nov 2020

Weather: A widely overcast day with extensive low cloud across the hills. Western and far northwestern foothills likely seeing the best of the shelter with bright or even sunny conditions here. Some summits may break through the cloud at times. Cloud tending to thin and break later in the day to leave a clearer evening.

Maximum wind: East 10-15 mph.

Chance of cloud free mountain/hill tops above 800m: 30%, with the best chance across west or northwest foothills. Otherwise, cloud extensive above around 200-300m.

Visibility: Widely very limited with fog conditions across large areas, but much improved towards the west coast.

Temperature: **Valleys:** 2-4C rising 6-8C.
At 800m: 2-4C.
Freezing level: Above summits.
